Full Stack Developer with a background in Systems Engineering (Universidad ORT Uruguay) and professional experience in web and backend development. Currently working at ST Consultores, contributing to projects with React, TypeScript, and Java, using PostgreSQL and Oracle databases, and deploying on JBoss and Tomcat servers. Passionate about technology, high-impact challenges, and creating efficient and scalable solutions.

PROFESSIONAL EXPERIENCE

ST Consultores

Montevideo, Uruguay

Full Stack Developer

June 2023–Present

- Contributed to the development of web applications using Java, React, and TypeScript, building dynamic interfaces and reusable components.
- Delivered innovative solutions tailored to specific client needs, integrating complex business logic and ensuring long-term maintainability.
- Actively participated in technical, planning, and stakeholder meetings, engaging in all phases of the software engineering lifecycle: analysis, design, development, testing, deployment, and maintenance.
- Configured and deployed applications on JBoss and Tomcat servers, supporting both testing and production environments.
- Worked within agile methodologies, participating in sprints, refinements, and continuous delivery with a strong focus on quality and deadlines.

EDUCATION

UNIVERSIDAD ORT de URUGUAY

Montevideo, Uruguay
